club, by a total of 600 tank troops. Nine buildings of the Adler Haserne quartered 900 to 1,000 soldiers of an AT artillery unit. 1-3h, 65 tanks and some JS tanks, 76.2-mm and 45-mm AT guns, 120-mm and 82-mm mortars, BA-64 armored scout cars and heavier armored scout cars with half-track chassis were seen in the area of the two barracks installations. The 8 to 10 colonels who arrived in the installation in early June were last seen there on 23 June. After this date contrary to previous practice, all troops fell in for a roll call every morning before they left the installation and were addressed by the commanding officer or another high-ranking officer, After the roll call, training in the terrain was conducted as usually, with groups consisting of I officer and 20 troops each. At 8 a.m. on 26 June, a large unit equipped with tanks, AT guns, heavy mortars, and numerous trucks with troops and field kitchens left the installation and returned on the evening of 28 June. On 27 June, another unit left the installation for a field exercise which, according to soldiers, was to last 5 days. The unit had not returned on the afternoon of I July, Or 26 June, when so alarm was given in the installation, all officers and soldiers present including Colonel Holoshkin (fnu) put on gas masks and rushed from their quarters to remove the motor vehicles from the garages. The troops carried assault equipment and small erms, but no steel helmets. They were not observed leaving the installation. (1)

5X1	Comments	
	(1) The report confirms that short-time exercises were conducted in retation	
	by units of the 1st Necz Div at the Doeberitz training area. It contains	
	no new information concerning the installations mentioned.	2
	Although information received on the various units quartered in the	
	boowen Kaserne indicates that a mechanized regiment is stationed there, it contains no clues as to the identity of the other units of the division	
•	which are believed to be quartered in the Ailor Kaserne and the Uperan	
	Resorne. The strongth figures mentioned in paragraph 2 of the present	
	report appear to be exaggerated.	25
